

KONARK'S INNOVATIVE TECHNOLOGY

Volume No. 158

Ingredient Delivery in the Body is often limited due to:

- Physiological Barriers
- Instability/Degradation during metabolic process
- Low Dissolution Rate

Poor Bioavailability is an undesirable consequence resulting due to the above.

Liposomal Technology is increasingly accepted as an Optimal Solution.

Why Liposome?

- Facilitate transportation across membranes
- Improves Solubility, augments Bioavailability and subsequently enhances the Bio-Efficacy of an ingredient.
- Enhanced Stability via Encapsulation

WHAT IS A LIPOSOMAL PRODUCT ?

An ingredient can be transformed to its Liposomal Variant by encapsulating it via Liposomal Technology.

Konark Herbals & Healthcare
proudly launches

LIPOSOMAL CURCUMIN

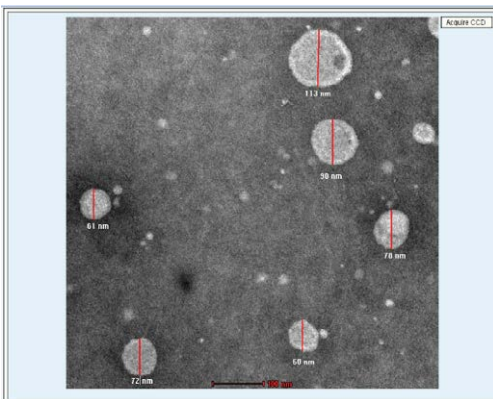

Through its Proprietary Technology

LIPOKON™ CURCUMIN

HELPS OVERCOME:

- Poor Aqueous Solubility
- Low Absorption from the Gut
- Rapid Metabolism & Degradation in the Gastrointestinal Tract
