Drinking aloe vera juice, empty stomach helps in removing toxins from our body. It also cleans our digestive system. Thus, aloe vera helps in naturally detoxifying our body

EUCALYPTUS OIL

Botanical Name:

Eucalyptus Globulus

Part of the Plant Used:

Leaves

Active Content:

Eucalyptol 60 - 99%

Colour:

Clear colorless to faint yellow colored liquid

Shelf Life:

3 years

Eucalyptus Essential Oil is a purifying, cleansing, clarifying, and immune-boosting oil that is ideal for use on skin and in aromatherapy. It is known for its ability to reduce or eliminate harmful surface and airborne bacteria, and infections upon contact.

LITERATURE AND PROPERTIES

Eucalyptus oil is the generic name for distilled oil from the leaf of Eucalyptus, a genus of the plant family Myrtaceae native to Australia and cultivated worldwide. Eucalyptus oil has a history of wide application, as a pharmaceutical, antiseptic, repellent, flavouring, fragrance and industrial uses. Eucalypts have been grown in plantations in many other countries because they are fast growing and have valuable timber, or can be used for pulpwood, for honey production or essential oils.

BENEFITS

- Anti-inflammatory
- Antispasmodic
- Antioxidant
- Antiseptic
- Decongestant

USES

**Relieves Stuffy Nose**

The most effective way to relieve stuffy nose is steam inhalation with eucalyptus oil. This oil reacts with the mucous membrane and helps to clear the congestion. It is a popular home remedy for asthma, bronchitis, sore throat, and cold.

**Eases Sore Muscle & Joint Pain**

Eucalyptus oil has anti-inflammatory properties that help to ease your joint and muscle pains. This oil is also present in various analgesic ointments and is used in sprains, strains, backache, and arthritis. Mix one or two drops with a carrier oil (like coconut oil) and rub it on the sore area in a circular motion for better results.

**Promotes Oral Health**

Eucalyptus oil reduces dental plaques, gingivitis, and bad breath. It has natural anti-inflammatory and antibacterial properties that can help reduce bacteria in the mouth. Many kinds of toothpaste and mouthwash have eucalyptus oil as an active ingredient. Add one to two drops of it into the water, then gargle and spit out or you can simply apply one drop to your toothpaste before brushing.

**Promotes Scalp Health & Clear Lice**

Eucalyptus oil promotes good scalp health and reduces dandruff, scalp fungal infection, etc. It is also an excellent remedy to clear lice by combining eucalyptus oil with tea tree oil. Add one drop of eucalyptus oil to your shampoo before applying it to your hair.

**Boosts Immunity**

Eucalyptus oil stimulates the immune system where white blood cells are activated and fight against the existing disease.

USES

Disinfects Wounds & Cuts

Eucalyptus oil disinfects and heals wounds and cuts and prevents infection. In diluted form, it is used to fight against inflammation and promote healing. It has antibacterial, antiviral, and antifungal properties that deal with all types of infections.

Insects & Rodents Repellent

Eucalyptus is an excellent insect and rodent repellent against mosquitoes, cockroaches, bugs, and rodents. Add 20 drops to a large bottle of water and spray around the targeted areas

Controls Blood Sugar

Eucalyptus oil is very effective to control blood sugar levels and managing diabetes.

Reduces Stress

Eucalyptus oil reduces stress and keeps mental state calm and balance. It is very useful to relieve anxiety before surgery.

Post-Surgery Pain Reliever

Eucalyptus oil reduces pain and inflammation of the affected area. People who inhaled eucalyptus oil after knee replacement surgery felt less pain. This oil also lowers blood pressure.
